

PRECISION ENGINEERING AND PERFORMANCE

BRAKE ROTORS & DRUMS

CARBONMAX HIGH CARBON CROSS DRILLED ROTORS

ProMax High Carbon Cross Drilled rotors are manufactured using more carbon content than traditional aftermarket disc rotors.

- Increased Carbon Levels and Higher Density
- Significantly Improves Thermal Stability
- Reduces Thermal Brake Judder, Heat Cracking & Noise
- Provides Maximum Braking Performance
- Long Lasting Corrosion Resistance
- GG15 Material

ROTOMAX PREMIUM COATED ROTORS AND DRUMS

- E-coat - Rust Protection Coating
- Superior Braking Power
- Mill Balanced
- Ready to Install Out of the Box
- Wide Coverage of Applications Available
- Manufactured to G3000 & Above Cast Iron Standards

PROMAX ROTORS AND DRUMS

- Best Quality and Value
- Mill Balanced
- Non-Directional Finish
- Painted Hat and Outer Edge
- Wide Coverage of Applications Available
- Manufactured to G3000 & Above Cast Iron Standards
